Minutes 2

26/10/15 - 2:30 pm - Jubilee Campus, Computer Science Building, B70

Attendees: Peter Blanchfield, Chen, Hamzah, Sam, Tom, Oliver, David, Daniel

What was said?	By whom?	What needs doing?
Greetings	All	-
•		
So this is a meeting just to catch up on the group work and make sure good progress is being made.	Peter	
Yes, we're getting everything sorted and moving on with things.	Hamzah	
Are you all meeting with Shalini?	Peter	
Yes, met twice with Shalini, and currently having a back and forth correspondence regarding UI designs.	Sam	
That's great. Now, have you decided on a team leader because we need to add someone as a master on GIT?	Peter	
Not quite, we were just talking about that actually, we haven't yet decided.	Sam	
Well if anyone would like to do it, preferably someone with experience with GIT?	Peter	
I'm happy to do that, I've had some experience with GIT before.	Sam	
Okay then, I'll set you as master on the repo. You'll have some privileges and will be able to revert changes if anything breaks.	Peter	
Have you done the Ethics Checklist document yet?	Peter	
Not finished yet, but we are working through it currently.	Sam	
Okay make sure that's finished before you start collecting any data. I need to have a meeting with all of you and the client at some point.	Peter	Finish Ethics Checklist

Okay that would be possible, we already have a meeting scheduled for next Friday.	Sam	
Yes, send me an email about that and I'll make sure we can all meet up. The main reason I want to be present is so that I can make sure the project is becoming something that the client would like, but also so that the client isn't turning this into something that would be impossible to do given the time frame.	Peter	
I think the client is already quite aware of the time restraints we have, the way it sounded in the last meeting she wanted to give us the option to change things if needed to fit the project and other commitments through university.	Hamzah	
Shalini did mention the potential to get some real babies in and take our own pictures for the apps. She's also waiting to hear back from the people at Bliss for confirmation to use their pictures and videos.	Sam	
Are you on track for all the design?	Peter	
Yes, still doing final changes with Shalini, but mostly finished at this point.	Oliver	
Good to hear you're all on track, was there anything else?	Peter	
Yes, we were talking about needing a developer account for Apple and Android, or the funding to pay for it so we can publish to the App Store and the Play Store.	Hamzah	
Okay we'll get those sorted out for you, I think I might have one but either way we'll get it sorted out so you can do that.	Peter	Get developer accounts
That's all then, I'll send you that email about the meeting so we can sort that out.	Sam	
Concludes meeting	All
